PROFESSIONAL EXPERIENCE

CareATC

Software Quality Engineer / April 2026 - Present

- Architected and built **PAT (Playwright Automated Testing)**, a reusable end-to-end testing platform that allows teams to create, run, and analyze Playwright test suites.
- Introduced automated testing at CareATC by implementing the platform and proposing end-to-end tests that cover the company's most critical application workflows.
- Identified and documented defects in development builds prior to release, reducing issues reaching production; supported after-hours deployment and release validation windows.
- Developed working knowledge of the medical/healthcare domain and the product's clinical workflows, applying that context to testing, requirements review, and cross-team communication.

Paycom

Software Developer / June 2025 - March 2026

- Contributed to *IWant*, an AI platform delivering **431%** ROI and saving **3,600+** hours annually.
- Built a GraphQL interface for the ACA module, enabling AI integration within a microservices architecture.
- Refactored ACA functionality into modular services as part of the Mantle repository initiative.
- Led development of key components for an ACA Year-End IRS submission system, including a React SPA and backend services.
- PHP, C#, MySQL, React, GraphQL, Cloud Infrastructure / Sharding, Self-Hosted LLMs, [Node.js](#), GitLab, Docker

University of Central Oklahoma

Software Developer & Research Assistant / February 2025 - May 2025

- Rebuilt network simulator with physics engine and IO features.
- Modeled fibrin networks **10× faster**.
- Presented redesign and research findings at Oklahoma Research Day 2025.
- Python, Rust, Tkinter, Cloud Computing

Oklahoma Department of Mental Health and Substance Abuse Services

Full Stack Web Development Intern & QA Team Lead / February 2022 - July 2023

- Developed QA system to test accessibility (WCAG) and functionality.
- Modernized legacy systems using Flutter/Dart.
- Developed a multilingual online form application that was used by **1700+ schools**.
- [Vue.js](#), Dart, Flutter, [ASP.NET](#), C#, Visual Basic, SQL Server, [AngularJS](#), [Node.js](#), Docker, GitHub

QualityLogic

Accessibility Software Tester & Team Lead / March 2021 - February 2022

- Led a small team of testers, coordinating tasks and ensuring consistent adherence to WCAG standards.
- Tested **100+** mobile and desktop applications.
- Tested Salesforce, Shopify, HP, Khan Academy, etc.

EDUCATION

UNIVERSITY OF CENTRAL OKLAHOMA

Bachelor of Computer Science

- Supervised, unsupervised, self-supervised, and reinforcement learning; Scikit-learn; agent orchestration, prompt engineering, and context-aware AI workflows.

CANADIAN VALLEY TECHNOLOGY CENTER

Diploma in Computer Programming

- 1st Place, Oklahoma State Competition BPA Web Design Team – [Link to website](#)
